RE: Kevin Watkins

To Whom It May Concern:

Kevin has been an employee of Tektility Inc since June of 2006. His knowledge and abilities are second to none. I have the utmost confidence sending him to a client or customer location to handle any problem or issue. I know he will get the job done in a timely and orderly manner and correctly.

I have met and worked with many computer technicians / network engineers. If there are better technicians in the Winchester area I have yet to meet them. Kevin's abilities, knowledge and skills are far above his level of education. While technology changes at incredible speeds he, does his best to keep up on the latest and newest trends.

Kevin has written "cleanup scripts" to keep our clients computers running at their best. He is skilled at pulling and terminating CAT 5E and coaxial cable. Building custom computers and trouble shooting computes and networks are second nature to him.

Kevin would be a great asset to any business. I wish him the best in the future.

Please contact me if you have any questions or require more information. I can be reached at cweger@tektility.com or at 800-279-5121 Ext 600.

Sincerely,

A handwritten signature in blue ink, appearing to read "Christopher Weger".
