RE: Kevin Watkins

To Whom It May Concern:

This is written as a personal and professional recommendation for Kevin Watkins. Kevin has been our "go to" man for computers since 2001. He has been most responsive and competent in his work.

We have multiple networked wireless computers that he maintains. Kevin is responsible for the network, the maintenance and back up of all our personal and business files. He is able to access our computers remotely and if required comes to our home to do his magic. We have always had each issue resolved in a timely and professional manner.

On a professional note, Kevin built a website for me that was not only great to look at but easy to navigate and use.

I have known Kevin for over 10 years and have always found him to be reliable, conscientious, prompt and thorough. Recommending Kevin for any computer issue, rebuild, network system or web design is easy because he is competent and reliable.

Should you want to discuss Kevin and his work, I can be reached at the above number or email.

Sincerely,

Lynda Tyler
